

Luz Saúde – Proactive and Reactive Maintenance Contract

A partnership for future technology upgrades.

Luz Saúde is a private-held Organization that provides health services to their customers. They have created an integrated network of healthcare providers that includes hospitals, outpatient clinics and residential healthcare facilities across Portugal.

Their main goal is to diagnose and treat patients rapidly and effectively, with absolute respect for the patient's individuality. Luz Saúde team rely on technology to book appointments, access patient records, access test results, research and diagnose conditions, communicate with colleagues and schedule staffing.

AXIANS is working together with Luz Saúde on **collaboration, communication, wireless, networking and security** and we built a **partnership** using our skills and knowledge of their infrastructure in order to advise them on **future technology upgrades**. AXIANS can also provide **international onsite/remote support**.

Our **Operations Center** and expert Engineering Services team fix problems quickly, 24/7 and our network check-up services allow **proactive network management to build resilience, mitigate risks and reduce admin**.
